

1st – 2nd Grade Summer Homework Guidelines

Hello Students!

I cannot wait to welcome you into 2nd grade in August! To help you prepare for the most awesome year of school EVER, I have prepared a summer homework packet that includes reading passages meant to increase your fluency and comprehension over the summer. In addition to this packet, I would like you to master your 1-10 addition and subtraction facts. To do this, purchase addition and subtraction flashcards and follow the guide below. Check off the boxes as you complete each week's task.

- Week 1: Pull out all the cards that include +1, -1, +2, -2, +3, and -3. Practice these nightly with a guardian or sibling.
- Week 2: Pull out all the cards that include +4 and -4. Practice these nightly with a guardian or sibling.
- Week 3: Pull out all the cards that include +5 and -5. Practice these nightly with a guardian or sibling.
- Week 4: Pull out all the cards that include +6 and -6. Practice these nightly with a guardian or sibling.
- Week 5: Pull out all the cards that include +7 and -7. Practice these nightly with a guardian or sibling.
- Week 6: Pull out all the cards that include +8 and -8. Practice these nightly with a guardian or sibling.
- Week 7: Pull out all the cards that include +9, -9, +10, and -10. Practice these nightly with a guardian or sibling.

If you are interested in practicing additional relevant math skills, some 2nd grade areas of focus I encourage practicing are counting money, reading and writing time, and adding and subtracting 2 and 3 digit numbers. Awesome free resources for these skills can be found on Teachers Pay Teachers and YouTube.

Bring your Summer Reading Packet to class on the FIRST DAY OF SCHOOL. Packets will be graded for completion.

Remember, this packet isn't meant to overwhelm you, it is meant to maintain your 1st grade learning and help prepare you for 2nd grade! I am looking forward to being your teacher next year!

Sincerely,
Ms. Cortines
